

IACCM's Contract and Commercial Management (CCM) Learning and Certification Program

How Do You Achieve “Commercial Excellence”?

Contract Management and commercial competence have become critical enablers of business performance, whether in public or private sector, with the potential to drive both value and reputation.

Competence is achieved through a combination of operational experience, structured learning and rigorous assessment.

The IACCM Contract and Commercial Management programs provide the journey to individual and organizational excellence.

What's Included in the IACCM CCM Program?

Pre-assessment: identification of personal and/or team development needs in the key areas of commercial skills and knowledge.

Learning: a flexible yet structured online program with student and instructor interactions covering the full contract lifecycle.

Certification: an internationally recognized certification in contract and commercial management at Practitioner, Advanced Practitioner or Expert level.

Three CCM Levels of Certification

CCM PRACTITIONER

Possesses the skills to understand and apply contracting principles and techniques in operational role with regular supervision.

CCM ADVANCED PRACTITIONER

Works with autonomy on a variety of contracts and commercial initiatives with experience in advanced operational techniques.

CCM EXPERT

Leads on complex and strategic cases, often requiring top executive interface and a high degree of personal judgment. Champions their professional function.

PROGRAM BENEFITS

Employers

- ✓ Make visible commitment to employee growth and excellence
- ✓ Provide positive benefit for new hires and support employee retention
- ✓ Achieve a compelling return on investment from improved performance
- ✓ Enhance functional status and influence through unique reporting and competitive insight

Individual

- ✓ Achieve world recognized accreditation
- ✓ Gain detailed knowledge of leading commercial practices
- ✓ Raise personal status and career path opportunities
- ✓ Join one of the fastest growing global communities
- ✓ Demonstrate your commitment to excellence and world class standards

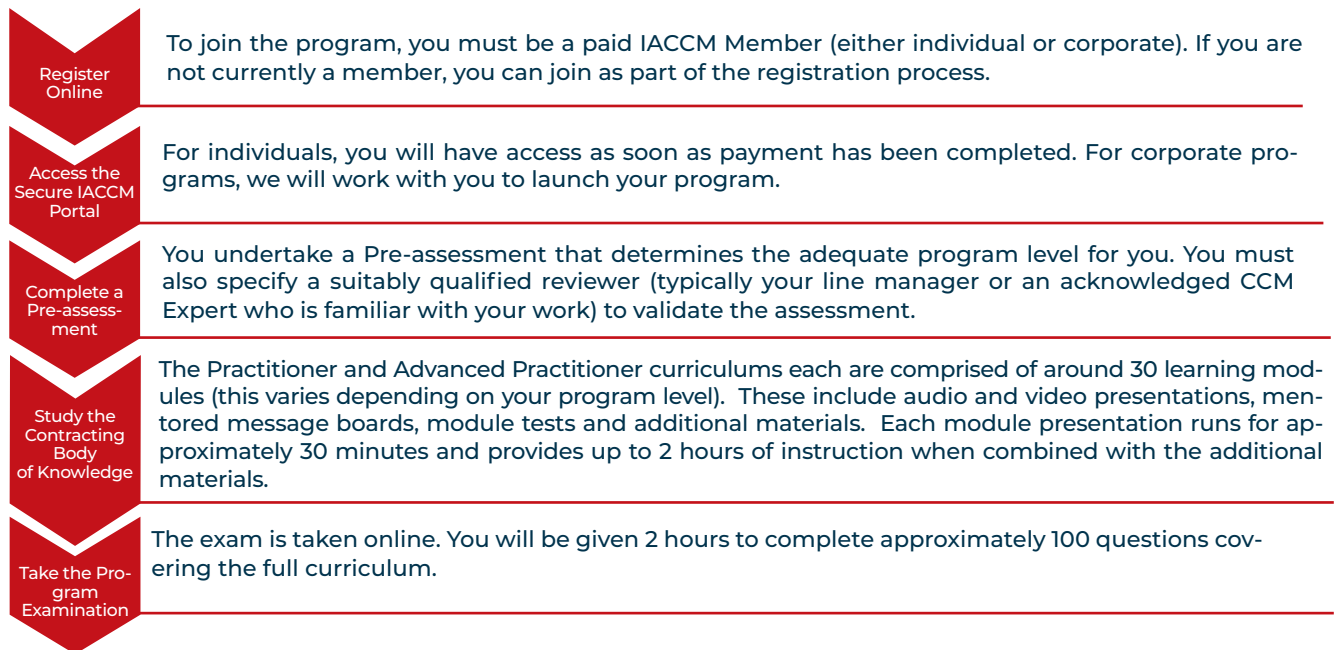

How does the CCM Program work?

IACCM Certification is based on a holistic assessment of your skills, experience and professional contribution, supported by examination and, at Expert level, demonstrated leadership and judgment.

The program is taken online on the secure IACCM Learning Portal. Each certification program is self-paced but typically takes 3-6 months to complete. It can be taken individually or, for teams of 6 or more, as an exclusive corporate cohort. You will have up to 12 months to complete the program.

The process of completing the program and achieving certification is as follows:

CCM Practitioner and Advanced Practitioner Certification

CCM Expert Certification

Expert certification is based on demonstrated credentials and experience. Candidates are required to develop a Business Case on an issue of practice, policy or organization. Those with qualifying submissions will be invited to present their Business Case to an Expert Panel. The Expert Panel has final decision authority on the award of Expert status.

Success

When you successfully complete the training, you will be awarded the status of CCM Practitioner, Advanced Practitioner or Expert. Your certificate will be made available in your member account and will be valid for 2 years.

You will be able to download one of the three badges associated with the program to list on your electronic signature and your online credentials.

Progressing to the next level of Certification

If you wish to advance to the next certification level, you may apply no sooner than 1 year after the date of your current certification award. Upon application, you will be requested to update your Pre-assessment to verify eligibility for the next level of certification. Once verified by your reviewer you will be asked to pay the fee applicable to your new learning program and you can get started.

Practitioner Level Learning Modules Overview

Initiate

- Contract & Commercial Management Introduction
- Contract Administration
- Requirements Definition
- Cost Benefit Analysis
- Sourcing Options
- Undertaking a Terms Audit
